PTFE-Coated Fiberglass Membrane

Product model: DLT-PJ9000

PTFE-coated fiberglass membrane for tensile roofs, canopies and architectural panels.

MATERIAL SPECIFICATIONS

Technology:	Multilayer PTFE coating
Base fabric:	Fiberglass filaments EC6
Surface:	Matte
Colour:	Beige; becomes white after bleaching
Weight:	1600gsm
Width:	3-3.8m
Thickness:	0.85mm
Tensile strength:	9300 (N/5cm) Warp / 9000 (N/5cm) Weft
Adhesion:	70 (N/5cm)
Light transmission at 550nm:	16-25%
Listed fire-test grade:	A1
Welding methods:	Hot bar welding/FEP welding tape
Listed service-life reference:	25 years; subject to project conditions
Suitable temperature:	-100°F to +450°F (-73°C to +232°C)

Values and available configurations are reproduced from the current material specification. Where a table lists several configurations, agree the selected construction for the order.

Listed fire-test grades or optional treatments do not certify every supplied configuration or finished product. Any test report applies to its submitted sample and stated test conditions.
